Daily Intervals and % Pass		
Process	Passed Intervals	% Pass
MPM/HASP	22	91.7%
RTPD	95	99.0%
RTD	286	99.3%

* A **Green** cell means that 100% of the expected data has been exchanged between applications for that specific interval.

* A **Green** cell does not represent the internal processing of each receiving application, wherein a failure may affect the final results you are expecting.

* If any known errors occur during internal processing of a receiving application we will endeavor to inform you as soon as possible.

* If any one of the multiple expected data exchanges fails to complete for a specific interval, then the cell color will turn to **Red**. The data you are expecting for that interval may still be valid, however there was an unexpected failure in the data exchange, and thus there is a potential for incomplete final results.

[Green] All Interval Data Exchanged successfully
 [Red] All Interval Data **did not** Exchange successfully
